SUMMARY

Frontend developer with 5 years of experience building multi-tenant SaaS products and internal systems with React, Next.js and TypeScript. Experienced working remotely for companies in the United States and Chile, integrating REST APIs (Laravel), authentication, real-time features and AWS S3 storage. Uses Claude Code at the core of the development workflow (MCP servers, skills and custom workflows), with human review of all generated code.

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript (ES2023), HTML5, CSS3, PHP, SQL

Frontend: React, Next.js (App Router), React Native (Expo), Vue.js, Vite, Tailwind CSS, shadcn/ui, Storybook

State & Forms: Redux Toolkit, Zustand, TanStack Query, React Hook Form, Zod

Testing: Vitest, React Testing Library, Playwright

APIs & Backend: REST, GraphQL (Apollo Client), WebSockets, Node.js, Laravel, Inertia.js, PostgreSQL

Tooling & Cloud: Git, GitHub Actions (CI/CD), Docker, Vercel, AWS S3, Railway, Sentry

AI-Assisted Development: Claude Code, Model Context Protocol (MCP), custom skills and workflows, GitHub Copilot

Practices: Multi-tenant SaaS architecture, Core Web Vitals, accessibility, design systems, micro-frontends, Scrum

PROFESSIONAL EXPERIENCE

Mid-Level Frontend Developer | **Savage Global Marketing** Apr 2025 – Oct 2026

Remote (company based in Florida, USA) · Marketing and consulting

- Led the rebuild of the legacy management system as a multi-tenant SaaS platform built with Next.js and TypeScript.
- Integrated Claude Code into the development workflow with MCP servers, custom skills and workflows, cutting delivery time for a new screen from about 2 days to a few hours, with human review of all code.
- Maintained and evolved the legacy system in production through refactoring, bug fixes and new features.
- Integrated Laravel REST APIs with TanStack Query and Redux Toolkit, including authentication and real-time WebSockets.
- Implemented file uploads and access permissions on Amazon S3, using Docker and Playwright end-to-end tests.

Frontend Developer | **Freelance** Mar 2025 – Nov 2025

Remote · B2B product

- Built and maintained the web and mobile frontend of a B2B product end to end with React, React Native (Expo) and Vite.
- Built forms and data layers with React Hook Form, Zod and TanStack Query, integrated with Laravel via Inertia.js.
- Contributed to architecture and UI/UX decisions, creating a custom design system with Tailwind CSS and shadcn/ui.
- Ensured accessibility and consistent UI behavior across devices and screen sizes.

Software Developer II | **Sonda IT** Jan 2023 – Jun 2024

Remote (company based in Santiago, Chile) · IT services and systems integration

- Built systems for Brazil's Federal Public Defender's Office (DPU) with Laravel, React, Vue.js and TypeScript.

Junior Full-Stack Developer | **JSL S.A.** Aug 2021 – Jan 2023

Telêmaco Borba, Brazil · Road logistics and transportation

- Developed and maintained the company's in-house logistics monitoring system, tracking the truck fleet and materials in transit, using PHP, React, Semantic UI and jQuery.
- Integrated data from external APIs into the monitoring system.

Junior Systems Analyst | **Vert IT** Jun 2020 – Sep 2020

Remote (company based in Brasília, Brazil) · IT services and systems integration

- Built React interfaces and maintained CMS platforms (Joomla), improving performance and usability.

EDUCATION

Associate Degree (Tecnólogo) in Systems Analysis and Development | Federal Institute of Paraná (IFPR), Brazil 2023
